

SUB-CONTRACT MACHINING

**CRAFTSMAN
TOOLS**

Collaborating with the World's Finest

55 Years' Expertise

Craftsman Tools is one of Europe's leading independent sub-contract manufacturers that has built an enviable reputation for manufacturing cost-effective, high quality products.

Blue-chip companies such as Sulzer, a leader in centrifugal pumps, and Cameron, an expert in oil extraction, have chosen Craftsman Tools as their long-term partner. Many other companies place similar trust in our know-how and experience.

Our services range from one-off prototypes through to large batch production.

We can manufacture products destined for various sectors, including:

- Aerospace
- Automotive
- Electrical Engineering
- Machine Tool Manufacture
- Oil Exploration
- Power Generation
- Renewable Energies

Superior Quality

Craftsman Tools is fully accredited to BS EN ISO 9001:2000. Throughout the company we apply the most exacting standards of quality control and ensure complete traceability of parts and material.

Our in-house quality process will be adapted to match your requirements.

In-process gauging is complemented by 100% inspection of critical dimensions. Rigid controls are maintained on outside suppliers and services.

Renishaw – in process gauging.

Our highly skilled apprentice-trained workforce ensures we continue to manufacture high quality, precision parts and components.

Everyone in the company takes great pride in maintaining delivery and service to our customers at all times.

We can manufacture parts up to 2 tonnes with turning up to 1500 mm diameter and milling up to 1 m cubed.

Typical Sub-contract Machining

Full Supply Chain Management

We offer flexibility, short lead times and optimum quality.

State-of-the-art Equipment

Craftsman Tools is committed to a constant programme of reinvestment.

Our Manufacturing Capability includes:

- Assembly / Fitting
- Hydrostatic Pressure Testing
- CNC Mill Turn Centres
- CNC Lathes
- Vertical CNC Lathes
- Centre Lathes
- Horizontal CNC Machining Centres
- Vertical CNC Machining Centres
- CNC Grinding
- Surface Grinders
- Cylindrical Grinders
- Milling Machines
- Wire Erosion

For more details, see our Full Plant List.

Comprehensive Services

To complement our own capacity, we have liaison with external suppliers of ancillary services, including:

- Chemical Blacking
- Heat Treatment
- Material Analysis
- NDE
- Spark Erosion
- Surface Coating

Diverse Components

We work with an extensive range of materials:

- Stainless steels
- Inconels
- Duplex alloys
- Super duplex alloys
- Titanium alloys
- Aluminium
- Bronze alloys
- Cast iron
- Plastics

Design Expertise

Craftsman Tools is a creative and innovation-led company, committed to cutting edge Research and Development.

We have modern 3D CAD facilities and continuously invest in the latest design techniques.

The company is highly experienced in designing the necessary workholding required to machine accurate, but affordable, components. (See our Workholding Brochure).

Market Leaders

Craftsman Tools contributes to their global position.

SULZER PUMPS

One of the World Leaders in Specialist Pumps for the Oil & Gas Industry.

“ We have worked in partnership with Craftsman Tools since 1996 and have used an ever-increasing range of their services. As our requests have evolved from simple parts to large complex components and coatings, they have always been flexible enough to adapt to our needs.”

Bob Foulkes – Sulzer Pumps (UK)

Commercial Director

CAMERON

Global provider of flow equipment products, systems and services to oil, gas and process industries.

When Craftsman Tools was established in 1953, Cameron Leeds offered significant support and advice. Our relationship has evolved over the years and now we also closely collaborate with Cameron Aberdeen, Eire and worldwide (Brazil, Germany, Singapore, USA...).

“ It’s always good to know we have a supplier who is able and prepared to do that little bit extra in order to support our business.”

David Tighe – Cameron (UK)

Commodity Controller
