

Kelvin TOP-SET Tutor Development Day

The Kelvin TOP-SET Tutor Development Day is designed to teach Senior Investigators (people who have attended the 3-Day Senior Investigator course) how to teach the 1-Day Investigator course and the 1-Day Quick Investigation course to people within their own organisation (under licence).

On successful completion of the course, attendees will be given all the tools required to teach both courses i.e. PowerPoint presentations, tutor DVDs and teaching notes.

Further to the course, tutors will have access to a designated 'Tutor Area' on the website where you can receive additional support and access to course materials. New case studies will be added yearly for tutors to download and use on their courses.

Tutor development ensures that incident investigation courses can become part of the company's internal teaching requirements, and provides greater flexibility than having employees travel to courses out-with the company.

Kelvin TOP-SET®'s directors reserve the right to attend any course taught by a licensed tutor for quality control purposes.
